

ADULT LEAGUE SCHEDULES CALENDAR SYNC OPTIONS

- Calendar Sync allows you to subscribe to your team's schedule and have it sync with your smartphone, tablet & computer Calendar applications
- Your games are automatically uploaded and, in the event of a schedule change, updated in your calendar so you'll always have the correct time
- Setting up your Calendar Sync is a snap! Just go to the RCF Daily Schedule page, find your team and choose your Calendar Sync option from the right hand side of the table
- The 2 Calendar Sync options are:
 - Get Calendar - this will download a .ics file for you to create a new calendar in your Calendar application
 - Copy Sync URL - this provides a link for you to plug in to a new calendar on your Calendar application
- NOTES:
 - Both options will update your calendar automatically with any changes but may take 24-48 hours to appear. FYI, our policy is to contact you and any rostered team members if a game changes within 48 hours of the original game time
 - Please don't use the Safari web browser to set up Calendar Sync -- for some reason, it has been less successful for this compared to Chrome/other browsers

Start by selecting your League
